

Event coordinator workflow

Actual Ground Control screens captured at 390 × 844 CSS pixels in Chrome. The walkthrough combines seeded Riverside demo records with browser-local simulated states. Signup, saves, uploads, AI results, roster generation, incident receipt, approvals and closeout were simulated for screenshots; no operational event records were changed. Alex illustrates new-account onboarding; Sarah and Mo illustrate the existing volunteer and coordinator demos. These are ordered representative journeys across preparation and live demo variants, rather than a single production transaction.

Native iOS/Android appearance, device push delivery, camera ingestion, real AI processing, email delivery and offline background retries were not validated by these captures. Voice screenshots use a simulated browser microphone and do not send or transcribe audio. Blank or first-use states are included where they explain entry into a feature; populated examples follow where relevant.

Read the numbered steps in order. Phases labelled “when needed” are conditional branches. Start a new account at step 1; returning users continue with their existing profile.

Safety decisions stay with a person. AI proposals and camera estimates inform review; coordinator approval is required before consequential crew moves.

Create the account: password

Choose a password and create your account.

A mobile app screen for creating an account, specifically the password step. The screen has a light pink background. At the top, there is a navigation bar with a back arrow on the left, the text "Ground Control" in the center, and "2 / 2" on the right. Below the navigation bar is a horizontal line. The main heading "Make it yours." is in a large, bold, black font. Below the heading is a subtext "Choose a password. Next, we'll get to know you." in a smaller, gray font. Below the subtext is a label "Password (at least 6 characters)" in a bold, black font. Below the label is a password input field with a blue border and a blue dotted line indicating the password length. Below the input field is a dark gray button with the text "Create account" in white.

← Ground Control 2 / 2

Make it yours.

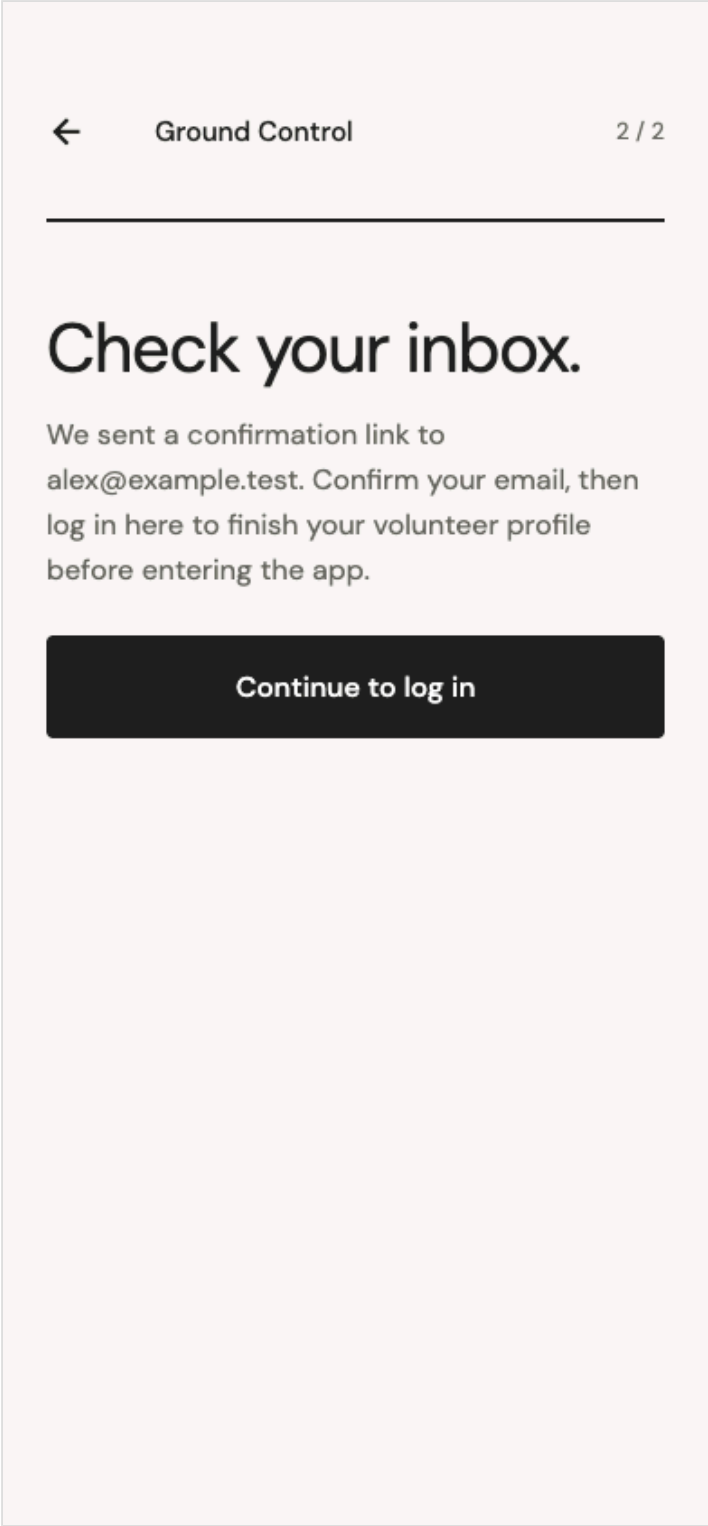

Choose a password. Next, we'll get to know you.

Password (at least 6 characters)

Confirm the signup email

Open the confirmation email, then return to log in. The email itself is outside the app.

Log in after email confirmation

Return after confirming the signup email and enter your email.

A mobile app login screen for 'Ground Control'. At the top, there is a navigation bar with a back arrow, the app name 'Ground Control', and a progress indicator '1 / 2'. Below the navigation bar is a horizontal progress bar. The main heading is 'Welcome back.' followed by the instruction 'Start with the email you use for Ground Control.' Below this is a label 'Email' and a text input field containing the email address 'sarah.demo@groundcontrol.example'. Under the input field is a large black button with the text 'Continue'. At the bottom of the screen is a link that says 'New here? Create an account'.

Review rest and break rules

Set scheduling limits before generating assignments.

Crew and roster

Roster & shifts

1. Generate shift times. 2. Automatically assign eligible crew. 3. Review and publish.

Rest and break rules

Rules apply to generated and manually assigned rosters. Rest is the gap between shifts starting on different work days. A sufficient gap between shifts resets continuous work. Zero disables a rest or continuous-work limit. These controls do not create staffed breaks within a shift; split shifts and cover those gaps explicitly.

Minimum rest between work days (hours)

0

Break needed to reset continuous work (minutes)

30
